Map with BWA-MEM  
parameters

## Tools

search tools

## Mapping

**STAR-Fusion** detect fusion genes in RNA-Seq data

**RNA STARSolo** mapping, demultiplexing and gene quantification for single cell RNA-seq

**Map with minimap2** A fast pairwise aligner for genomic and spliced nucleotide sequences

**bwameth** Fast and accurate aligner of BS-Seq reads.

**Parse blast XML output**

**Megablast** compare short reads against htgs, nt, and wgs databases

**Map with BWA for Illumina** deprecated

**Map with Bowtie for Illumina**

**LASTZ** : align long sequences

**Bowtie2** - map reads against reference genome

**LASTZ\_D** : estimate substitution scores matrix

**Map with BWA-MEM** - map medium and long reads (> 100 bp) against reference genome

**Map with BWA-MEM** - map medium and long reads (> 100 bp) against reference genome  
(Galaxy Version 0.7.17.1)

 Versions

▼ Options

Will you select a reference genome from your history or use a built-in index?

Use a built-in genome index

Built-ins were indexed using default options. See "Indexes" section of help below

Using reference genome

Human (Homo sapiens) (b38): hg38

Select genome from the list

Single or Paired-end reads

Paired

Select between paired and single end data

Select first set of reads

1: ZR751 paired-end RNA-seq subsampled (end 1)

Specify dataset with forward reads

Select second set of reads

2: ZR751 paired-end RNA-seq subsampled (end 2)

Specify dataset with reverse reads

Enter mean, standard deviation, max, and min for insert lengths.

-l: This parameter is only used for paired reads. Only mean is required while sd, max, and min will be inferred. Examples: both "250" and "250,25" will work while "250,,10" will not. See below for details.

Set read groups information?

**Set read groups information?**

Set read groups (SAM/BAM specification)

Specifying read group information can greatly simplify your downstream analyses by allowing combining multiple datasets.

**Auto-assign**

Yes No

Use dataset name or collection information to automatically assign this value

**Auto-assign**

Yes No

Use dataset name or collection information to automatically assign this value

**Platform/technology used to produce the reads (PL)**

ILLUMINA

**Auto-assign**

Yes No
